

## FUEL CELL

### ABSTRACT

Fuel cells and methods of operating fuel cells are disclosed. In one aspect, the  
5 invention features a fuel source for a fuel cell including a housing having an outlet, a  
structure having a portion in the housing, the structure defining a cavity and having a surface  
defining an opening in fluid communication with the cavity, and a fuel in the housing. The  
fuel is in fluid communication with the outlet through the opening and the cavity of the  
structure.
